

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.

Is Iraq a good country for solar energy?

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be the third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the country's total system capacity.

What is the 6th Iraq Energy Forum?

Our 6th flagship event will once again bring together an exclusive lineup of policy and decision-makers, government officials, experts, analysts, and industry leaders from the investor community in Iraq, the Middle East, and beyond. Iraq Energy Institute Announces 6th Iraq Energy Forum on 18-20 June....

What type of energy is used in Iraq?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iraq: How much of the country's energy comes from nuclear power?

How does Iraq generate electricity?

Iraq's electricity generation primarily depends on fossil fuels. In 2021, natural gas was the largest source at 57.3% of the total, followed by oil at 36.7%. Renewable energy, mainly from hydroelectric power, contributed 5.9%. As of 2023, the 30 gigawatts (GW) of installed capacity cannot meet summer peak demand.

How much natural gas did Iraq produce in 2022?

Iraq consumed significantly more natural gas than it produced in 2021, primarily for electric power generation. The country also flared over 630 billion cubic feet (Bcf) of natural gas in 2022 due to inadequate pipeline and processing infrastructure, making it the second-largest flaring country globally.

We compliment Iraq and Total Energies on the signing of a \$27-billion energy deal that will accelerate Iraq's path to energy self-sufficiency and advance Iraq's collective climate change objectives. Years in the making, the Gas Growth Integrated Project aims to capture flared gas and deploy renewable energy sources. The United States strongly supports Iraq's efforts [...]

A review of South Korea's crude oil trade indicates that spot crude oil imports from the US grew at an average of 21% between 2018 and 2022, while spot cargo imports from the Middle East dropped by 10% during ...
