Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

Do solar panels need to be south facing?

Solar panels need to be south facing for maximum exposure. Is your property surrounded by trees or buildings that may cast a shadow over solar panels - this can significantly reduce the amount of electricity generated. And, of course, is your roof structurally sound? Not only will it have to support the solar panels but also the fixing frames.

How reliable are solar panels?

Solar panels convert the light from the sun into electricity, with no moving parts they are very reliable a 30 year life is realistic, that means with payback averaged at 9 years, you can have 21 years of free electricity! Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity).
