Who controls the electricity market in Paraguay?

The National Electricity Administration(Administración Nacional de Electricidad,ANDE),Paraguay's state-owned utility,controls the country's entire electricity market,including generation,transmission and distribution.

Where does Paraguay's electricity come from?

All of Paraguay's electricity for domestic consumption comes from a single facility,the binational 14 GW Itaipu hydroelectric dam. Source: ESMAP,2006. Installed capacity shown for Itaipu and Yacyretá refers only to the Parguayan share in these plants.

Why does Paraguay have a poor electricity system?

However,despite the abundance of resources,the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and distribution networks. In addition,distribution losses are among the highest in the region.

When did Paraguay become a hydroelectric company?

In April 1973,the governments of Paraguay and Brazil signed the Itaipu Treaty,by which it was decided to create a binational entity to hydroelectric use of the Paraná River. This entity was constituted by ANDE (Paraguay) and ELECTROBRAS (Brazil). US\$100 million were contributed in equal parts by both companies.

Are there CDM projects in Paraguay?

Currently (August 2008),there are no registered CDM projectsin any sector in Paraguay. The low emission factor of a fully hydroelectric system is most likely the reason for the absence of this type of projects in the electricity sector.
