

With UNDP support, the Kazakhstan Government is improving the standards of legislation related to the development and implementation of policies, programmes and regulations to reduce investment risks and increase ...

Effective climate action to reduce carbon emissions could help Kazakhstan diversify its fossil fuel-dependent economy and open up new drivers of economic growth and prosperity for its people, says a pioneering World Bank report released today.

The Government of Kazakhstan has set out toward meeting these ambitious goals by holding Central Asia's first ever competitive auctions for renewable energy projects, where private companies offer to build and operate plants and sell the electricity at low cost.

The energy market study was prepared as part of the annual energy reviews. In the study, PwC experts analyzed the electricity markets of the world and Kazakhstan, as well as the fossil fuel ...

The report recognises that energy prices are a significant social concern in Kazakhstan. A rise in prices for liquified gas used in vehicles contributed to the unrest that gripped the country in January 2022.

The energy market study was prepared as part of the annual energy reviews. In the study, PwC experts analyzed the electricity markets of the world and Kazakhstan, as well as the fossil fuel markets.
