KEMET Corporation, a subsidiary of Yageo Corporation (TAIEX: 2327), manufactures a broad selection of capacitor technologies such as tantalum, aluminum, multilayer ceramic, film, paper, polymer electrolytic, and supercapacitors.

OverviewHistoryProducts and servicesResearch and developmentAwardsExternal linksKEMET Corporation, a subsidiary of Yageo Corporation (TAIEX: 2327), manufactures a broad selection of capacitor technologies such as tantalum, aluminum, multilayer ceramic, film, paper, polymer electrolytic, and supercapacitors. KEMET also manufactures a variety of other passive electronic components, such as AC line filters, EMI cores and filters, flex supp...

KEMET provides advanced energy systems and instrumentation for industries including oil & gas, power plants, and nuclear power. With over 10 years of expertise, we deliver innovative and reliable solutions customized to meet demanding operational needs

With expertise in energy transition and power systems, we provide optimized and reliable solutions for flexible grids. Our services support lifecycle performance, safety, and sustainability across industries like marine, military, and oil & gas

KEMET helps their customers build a better tomorrow with the broadest selection of capacitor technologies in the industry, along with an expanding range of electromechanical devices, electromagnetic compatibility solutions and supercapacitors.

KEMET Corporation is a provider of Industrial IoT sensors technologies based in the United States. KEMET Corporation is active in the aerospace, automotive, consumer goods, healthcare and hospitals, national security and defense, renewable ...

Kemet Corporation is a leading global supplier of capacitors, which store, filter, and regulate electrical energy and current flow and are found in virtually all electronic products and components. Specifically, Kemet is the largest producer of solid tantalum capacitors in the world and the second largest maker of multilayered ceramic ...

Explore KEMET's advanced power supply systems and instrumentation solutions designed for power plant application. Our UPS systems, inverters, and load banks ensure uninterrupted power and reliable performance in critical environments.

KEMET Corporation has been awarded a \$15.1 million Department of Energy (DOE) grant to support the development of electric-drive vehicles in the United States. Headquartered in Simpsonville, S.C., KEMET is a

## Kemet energy United States

leading manufacturer of tantalum, ceramic, film and electrolytic capacitors - all critical subcomponents in hybrid electric-drive systems.
