

Laos power station home backup

What is a whole home power backup solution?

For more extended power outages (and greater energy security), the advanced EcoFlow Whole Home Power Backup Solution combines two EcoFlow DELTA Pro portable power stations with a double voltage hub. With a combined output and storage capacity of 7200W, you can fully power the average home for 1-2 days.

Do you need a backup power solution if the grid fails?

Your electricity needs don't just go away when the grid fails. The right backup power solution gives you peace of mind and energy security. EcoFlow has a wide range of options for portable power stations, home backup batteries, and solar generators. Chances are, we have the right solution for you. *Under 2000W output

Can a Powerwall provide a full home backup?

With either material, you'll be able to provide whole home or partial home backup depending on how many Powerwalls you install. For example, one panel typically is able to power lights, outlets, and small appliances but no large appliances.
