The largest energy storage battery system will provide energy storage to transfer the generated electricity to users when there is a shortage in the electricity system. The battery system includes six battery containers, three inverter/transformer container and one distribution point container, providing a total electric capacity of up to 20 MWh.

Hoymiles supplies the batteries as Latvia activates its first utility-scale battery energy storage system (BESS) ahead of planned decoupling from Russian grid. By Tristan ...

The project in Latvia will be their largest battery system to date, aligning with their strategic business domain of providing sustainable and reliable energy security solutions globally. The modern battery system will offer rapid, ...

The project in Latvia will be their largest battery system to date, aligning with their strategic business domain of providing sustainable and reliable energy security solutions globally. The modern battery system will offer rapid, automatically activated frequency regulation reserves essential for synchronization mode, where Baltic states ...

Germany-based Rolls-Royce has been awarded a contract to supply two large-scale battery energy storage systems to Augstsprieguma tīkls (AST), Latvia's transmission system operator, with a ...

Rolls-Royce has received an order from the Latvian transmission system operator Augstsprieguma tīkls (AST) to supply an mtu large-scale battery storage system to secure the Latvian power grid. In 2025, Latvia, together with the other Baltic states, will synchronize its energy supply system with the continental European power grid.

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region.
