How long do solar panels last in Latvia?

Solar panels require almost no maintenance during their lifetime. In addition, rain cleans the surface of the panels well. The payback period for correctly adapting to the consumption of solar panels is 4-7 years. Why are more and more people in Latvia installing solar panels and inverters?

How many solar panels are installed in Latvia?

As of June 2023, the number of solar panels installed by the Latvian population and connected to AS "Sadale tīkls" reached 15,000 units, and their total capacity exceeded 120 MW - about 15% of the total electricity consumption in Latvia on a sunny day. Solar panels have a lifespan of more than 25 years.

How much sunlight does Latvia receive a year?

In our climate, one square meter of surface receives an average of 1200 kWh per year from the sun. The duration of direct sunlight in Latvia exceeds 1800 hours. The new type of solar panels produces energy with the so-called scattered radiation, which exists around us for 4000 hours.

Prepare the Wall: Before installing the moss wall panel, ensure that the wall is clean and free from any moisture. If the wall is damp, it can lead to mold growth behind the moss panel. **Measure and Mark:** Measure the area where you want to install the moss wall panel and mark the boundaries. This will help in placing the panel correctly.

This is on the same wavelength as the healthiest rays from the sun. Infrared panels heat objects directly, rather than warming the air (which is what convection heat does), and thus creates the best and cosiest feeling warmth for you. ...
