

# Leader energy Venezuela

What if Venezuela gets new leadership?

For example, if given the needed investment, Venezuela could ramp up production to 2.6 million bpd in the next ten years, according to an estimate by IPD Latin America, a consulting firm. Yet even if Venezuela gets new leadership, it still has many roadblocks ahead in persuading energy investment to jump back in.

Could Venezuela re-open its energy sector?

This ability to sell its oil to a top market once made it one of the richest South American countries, all centered on an oil production of more than 3.4 million barrels per day (bpd). This history could enable Venezuela to re-open its energy sector to the investment world, potentially attracting billions of dollars, if its leadership changes.

Could Venezuela's oil industry shift Republicans from Trump's 'maximum pressure' approach?

The oil industry and financiers with stakes in the Venezuelan economy see an opportunity to shift the Republicans away from the "maximum pressure" approach of President-elect Trump's first term. This was premised on strict sanctions, aimed at forcing out President Nicolás Maduro, an authoritarian socialist.

What is the role of coal in Venezuela's energy mix?

In comparison to oil and natural gas, coal plays a minor role in Venezuela's energy mix, accounting for 0.2% of total energy production and 0.1% of total energy consumption. Venezuela's coal industry has faced challenges such as outdated infrastructure and limited investment, which has affected production.

What is the main source of revenue for the Venezuelan government?

PDVSA is the largest source of revenue for the Venezuelan government. When Venezuela nationalized its oil industry in the 1970s, PDVSA was formed. The government gave the company significant autonomy until the 1990s, when it took direct control of PDVSA.

Will Chevron be able to produce crude oil in Venezuela?

Much of Venezuela's crude oil production capacity and infrastructure have suffered from a decade-long lack of capital and regular maintenance. Chevron's earlier exemption increased its production to 135,000 barrels per day (b/d) in 2023, and we expect Chevron's output in Venezuela to reach 200,000 b/d by the end of 2024.

Venezuela has officially lost its most prized international asset: Citgo Petroleum, the 807,000-bbl/d U.S. refining arm of state-owned Petróleos de Venezuela (PDVSA). The final auction price went for \$7.3 billion to winning bidder Amber Energy Inc., which boasts the backing of a group of strategic U.S. energy investors, including Florida-based Elliott Investment ...
