Lina energy Itd Bhutan

What is Lina energy?

LiNa Energy is helping the energy sector accelerate the transition to Net Zero, through our safer and more sustainable alternative to lithium ion. We are leading the charge to develop and commercialise low-cost solid state sodium batteries, with a focus on the renewable energy storage market.

How does Lina energy storage work?

On discharge, the sodium is oxidised back to sodium ions and travels through the conductive backbone, recrystallising in the cathode. LiNa's energy storage systems take a radical approach to thermal management, providing customers with low-cost and high performance energy storage even in high ambient temperatures.

Who are the Lina energy executive team?

LiNa Energy Executive Team (7) Update this profile Name Title Board Seat Contact Info Gene Lewis Ph.D Chief Executive Officer & Director James Morrish Chief Financial Officer & Board Member Richard Dawson Ph.D Co-Founder, Chief Technology Officer & Board Member Mark Boland Co-Founder, Company Secretary & Board Member William Tope

What makes Lina batteries unique?

Materials are abundant and thanks to our patented design, our batteries are ideal for mass manufacture. LiNa's battery cells are the building block of LiNa Energy's battery platform. The cells utilise proven Sodium-Metal-Chloride chemistry in a breakthrough planar design made possible by our ultra-thin solid ceramic electrolyte.

How do I view Lina energy's valuation and funding history?

To view LiNa Energy's complete valuation and funding history, request access » LiNa Energy Cap Table Stock # of Shares Authorized Par Value Dividend Rate (%) Original Issue Price Liquidation Liquidation Pref. Patents Assigned to Lina Energy Ltd. Electrolyte Element and a Cell Incorporating the Electrolyte Element. Publication number: 20200243916 Abstract: An electrolyte element (10) comprises a perforated sheet (11) of non-reactive metal such as an aluminium-bearing ferritic steel, and a non-permeable ceramic layer (16b) of sodium-ion-conducting ...

We are extremely excited to welcome Will as the new CEO of LiNa as we accelerate our revenue generation and commercialisation journey" Arvind Sabharwal, Chairman of the Board at LiNa Energy. Emerging in 2017, LiNa has pioneered the development of their solid-state sodium battery platform which enables high performance from abundant raw ...

LiNa Energy is a developer and provider of low-cost solid state sodium batteries, with a focus on the renewable energy storage market. LiNa Energy was created as a spin-out of Lancaster University, where the founders Dr Gene Lewis and Dr Richard Dawson combined their expertise in ceramics and electrochemistry and applied this to the problem of energy storage.

Calculating energy density is very easy - you simply take the energy of the cell and divide it by the mass or volume. One of our Gen 1 cells has a capacity of 8.32 Wh and a weight of 64.7g, equating to an energy density of 129 Wh/kg.

LiNa Energy has closed out a £3.5m late seed funding round, attracting a combination of existing and new investors who recognise the vast potential of their game-changing battery technology. This funding will enable the company to advance their technology through expanding their laboratory facilities, stepping-up recruitment and buying new ...

LiNa Energy has been selected as one of the few companies participating in the Battery Technology GBIP Japan by Innovate UK. With a full agenda planned and valuable networking meetings scheduled, LiNa"s CCO ...

Last week Will was at the MeetFounders Venture Capital Night at Zendesk where LiNa Energy won best start-up of the night? This is an achievement the whole team is delighted with and a testament to all the hard work that goes on behind the scenes every day as we lead the charge to develop and commercialise our solid-state sodium battery.

LiNa Energy General Information Description. Developer of solid-state sodium batteries designed to offer safety, sustainability, and lower cost versus lithium-ion. The company commercializes a safe, high-performance, low-cost, solid-state sodium battery technology targeted at stationary storage applications, it commercializes low-cost solid-state sodium batteries optimized for the ...
