Republic of the Marshall Islands 3.2 When electronic publications with backups are carried, those portions needed for navigation while underway (tides and current tables, light list, etc.) must be printed and included with the voyage plan, unless the backup is an independent computer system with its own emergency power source.

"The Republic of the Marshall Islands (RMI) submitted its second NDC in 2018 at COP 24 in Katowice, making it the first country in the world to do so. The revised NDC set binding targets of reducing greenhouse gas emissions by 32 percent below 2010 levels in or before 2025 and by 45 percent before 2030.

We have been providing solar power systems to schools, hospitals, community halls, churches and homes all over the Marshall Islands. On many of these islands there is no central power grid, and therefore small-scale locally generated power systems greatly benefit the local population by minimizing the use of expensive imported fuel.
