The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it ...

The current position of SUN MASTER is at East Asia reported 4 mins ago by AIS. The vessel is en route to KZU OFF, and expected to arrive there on Sep 13, 00:00. The vessel SUN MASTER (IMO 9460681, MMSI 538004216) is a Bulk Carrier built in 2011 (13 years old) and currently sailing under the flag of Marshall Islands.

The intention of our solar projects is to provide a usable, sustainable, and cost effective supply of electricity for specific uses. By integrating the customer into the lifestyle of using a solar power system, and providing training and technical support, we find the users are much more likely to properly maintain their systems for the long-term.

The location at Airok, Ailinglaplap Atoll, Marshall Islands, situated at 7.2786° N, 168.8217° E, presents a highly favorable environment for solar energy production throughout the year ing ...

The month of July in Marshall Islands experiences essentially constant cloud cover, with the percentage of time that the sky is overcast or mostly cloudy remaining about 80% throughout the month. The highest chance of overcast or mostly cloudy conditions is 81% on July 13.. The clearest day of the month is July 31, with clear, mostly clear, or partly cloudy conditions 21% of ...
