

Is Mauritania poised to become a major supplier of natural gas?

Mauritania is poised to become a significant global producer of natural gas and a leading player in Africa. With estimated gas reserves of 1400 billion cubic meters, the country has the potential to become a major supplier in the global market.

Can Mauritania produce green hydrogen?

Thanks to its unique solar and wind resources, Mauritania has proved to be exceptionally well-placed to implement Power-to-X solutions, providing Nour Project the possibility to produce among the most competitive green hydrogen in the world.

Should Mauritania invest in wind energy?

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to reduce reliance on fossil fuels and combat climate change.

What is Total Eren doing in Mauritania?

We lead several community outreach initiatives in the country. In Mauritania, we are pursuing plans to build a floating solar power plant on the Manantali Dam, which would also supply Mali, Senegal and the Republic of Guinea. Our affiliate Total Eren is also developing rural electrification projects in the country.

Can Mauritania harness wind energy?

Mauritania also possesses significant potential for harnessing wind energy. The country is blessed with strong and continuous wind most days of the year, with an average wind speed of 7 meters per second. This makes it ideal for both onshore and offshore wind farm development.

Why should you invest in Mauritania?

Investing in Mauritania can offer a wide range of opportunities, particularly in the energy sector. With major gas discoveries and large-scale renewable energy projects in development, the country is poised for significant growth in this area.

This article delves into the timeline of Mauritania's natural gas development, highlighting key milestones, significant discoveries, and the collaborative efforts of companies like Kosmos Energy, BP, Shell, Qatar Energy, and Total Energy. ...

In other words, about 2.6 million out of a total population of 4 million people lack access to electricity. In 2018, the installed generation capacity was 500 MW, with a renewable energy (hydro, solar and wind) share of 41%. Given the 100 MW of wind power under construction, the share of renewable energy in the energy mix will soon be about 50%.
