

How will Mauritius transition to a low carbon economy?

The Mauritian energy transition to a low carbon economy is picking up speed. The CEB has installed the first grid-scale Battery Energy Storage System (BESS), the first in its kind in Mauritius, to enable high capacity storage of renewable energy in the grid.

Why is battery energy storage system being introduced in Mauritius?

In view of the increasing share of the Variable Renewable Energy (VRE) in the energy mix of Mauritius, the CEB has planned for the introduction of Battery Energy Storage System on its network to arrest the fluctuation inherent to the VRE systems. The Mauritian energy transition to a low carbon economy is picking up speed.

What is Mauritius' long term energy strategy?

This is in line with the Government of Mauritius' Long Term Energy Strategy 2009-2025 to increase the share of renewable energy in our energy mix (electricity production, transportation sector and manufacturing) to 35% by, namely, reducing the country's dependence on coal and heavy oil for electricity generation.

How much energy does Mauritius generate?

Mauritius has a nominal installed capacity of 876.76 MW, out of which 498.47 MW are from CEB generating units and the remaining 378.29 MW are from Independent Power Producers, Medium Scale Distributed Generators and Small Scale Distributed Generators. In 2018, the total energy generated amounted to 2,827.6 GWh.

How much power does Mauritius need in 2021?

From 2020 to 2021, re-exporting and bunkering of energy sources decreased by 7%, from 679 ktoe to 631 ktoe (Table 6). The peak power demand in 2021 was reached in December: about 471 MW for Island of Mauritius and 7.9 MW for Rodrigues.

Is biomass a source of electricity in Mauritius?

Traditional biomass, such as the burning of charcoal, crop waste, and other organic matter, is not a source of electricity in Mauritius. However, it can be an important source in lower-income settings. Mauritius gets its electricity from nuclear power and renewable sources, which are low-carbon options.
