

Renewable energy includes wind, solar, biomass and geothermal energy sources. Almost half of the electricity used in the country is provided by renewable energy sources. The main renewable resource is hydroelectric power. Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment, especially taking into ...

Commercial EPCs Home - Compliance - Energy Performance Certificate - Commercial EPCs Commercial

Energy Performance Certificates (EPCs) From April 2023, new legislation requires all commercial rental properties to have an EPC rating of at least E or better and failure to achieve this will see landlords face potential fines of up to €150,000. But don't [...]

This type of condensation occurs on the visible surfaces of a construction, rather than between the layers. Internal surface condensation can promote mould growth, creating unsightly staining and reducing indoor air quality.. Thermal bridges can undermine effective insulation and can contribute to the formation of surface condensation as the cool air is drawn out, leaving the ...

Energrid provides the most efficient solar energy solutions in the Baltics! We design and install solar panels, car charging stations, metal structures, etc. +371 29710098. ... complete energy infrastructure to everyone in Latvia. Because electricity is the foundation for a quality life and a competitive business. Team. Energrid.

In volcanic regions of the world, geothermal energy is harnessed to provide a cleaner energy source for power. For example, in Iceland over 25% of the electricity comes from this source (NEA Iceland). Countries with lower subsurface heat resources, such as the UK, can still benefit from geothermal sources.
