

If photovoltaic solar power - one of the simplest and most reliable renewable energy systems - has problems in Micronesia, how can we hope to solve our energy problem? The solutions lie in fitting renewable energy systems into traditional Micronesian ways of life.

If photovoltaic solar power - one of the simplest and most reliable renewable energy systems - has problems in Micronesia, how can we hope to solve our energy problem? The solutions lie ...

The Renewable Energy and Energy Efficiency in the Federated States of Micronesia project contributes to the FSM's Energy Master Plan focused on rapidly boosting access to energy for ...

The country is striving to overcome electricity access needs, reduce high energy costs, and ensure energy security. Currently, almost all of the electricity produced in Micronesia is dependent upon imported petroleum based fossil fuels, with some solar photovoltaic systems in operation.

Total electrical independence starts here. Our off-grid PV kits are the quickest and easiest way to deliver electricity independent from the standard utility grid. Our Helios series is the off-grid PV energy solution for those who need reliable electricity year round.

The Renewable Energy and Energy Efficiency in the Federated States of Micronesia project contributes to the FSM's Energy Master Plan focused on rapidly boosting access to energy for its peoples whilst reducing the reliance on fossil fuel imports to drive energy supply.

Scale-up renewable energy generation in the states of Chuuk, Kosrae and Yap; Improve the performance of the Pohnpei Utility Corporation, including solutions for a thermal power plant and implementation of grid enhancement in the state of Pohnpei;
