[illegible]

Currently, the power production is dominated by hydropower with a share of 56% in electricity generation, followed by natural gas with 41.4% and coal with 2.2%. The electric power consumption is also low among ASEAN member state, with 317 kWh per capita. The electricity is purchased around 0.04 USD/kWh [2].

potential strategic implications for Myanmar's nascent off-grid sector. For us at Smart Power Myanmar, this report provides robust evidence-base to justify the direction of our strategy and our key recommendations for Myanmar, including the need for a greater emphasis on least-cost planning; the need for innovative and results-based
