Who manages Myanmar's energy sector?

Myanmar's energy sector is managed by the Ministry of Electric Power(MOEP) and the Ministry of Energy (MOE),which together account for over one-third of public sector revenue. Before May 2022,the two ministries operated under one single Ministry of Electricity and Energy (MOEE).

Can Myanmar revive the development of hydropower and LNG-to-power?

In the longer term,Myanmar can revive the development of hydropower and LNG-to-power,which were planned in the past or were under construction but did not materialize. Political and macroeconomic stability is important to improve investment climate for these options on the ground.

How can Myanmar improve its power system?

Rebuilding Myanmar's power system will require establishing trust to develop the power sector. Developing solar PVcan add incremental generating capacity in a relatively fast manner.

Should Myanmar develop solar PV?

Developing solar PV can add incremental generating capacity in a relatively fast manner. In the longer term, Myanmar can revive the development of hydropower and LNG-to-power, which were planned in the past or were under construction but did not materialize.

What's happening in Myanmar's electricity infrastructure?

Source: Myanmar Institute for Peace and Security. The reported number of conflict-related incidentson electricity infrastructure has been declining following the peak in late 2021 and early 2022,but grid network capacity remains vulnerable.

Why did Myanmar's power sector lose so much?

Myanmar's power sector continues to record losses due to a combination of several factors,including currency depreciation,increasing grid maintenance cost,and revenue decline. Despite ambitious tarif adjustment in July 2019,the power sector was not at cost recovery.
