

PRESS RELEASE. 24 September 2024. On 19 September, European Commission President Ursula von der Leyen and International Energy Agency (IEA) Executive Director Fatih Birol held a joint press conference in Brussels to address Ukraine's energy security for the upcoming winter. A day later, on 20 September in Kyiv, European Commission ...

Opinion article co-sponsored by COGEN Europe and the PACE Project, published on Euractiv (24 April 2023). Article by Hans Korteweg, Managing Director, COGEN Europe According to official EU figures, buildings are responsible for around 40% of energy consumption and 36% of energy-related greenhouse gas emissions. At both EU and national levels, policies ...

COGEN Europe | 2 045 abonnements sur LinkedIn. COGEN Europe is the European Association for the Promotion of Cogeneration. Cogeneration or Combined Heat and Power (CHP) is the most efficient way to deliver heating, cooling and electricity. It is based on the simultaneous production of electricity and thermal energy, both of which are used.

Cogeneration or Combined Heat and Power (CHP) is the most efficient way to deliver heating, cooling and electricity. It is based on the simultaneous production of electricity and thermal energy, both of which are used.

COGEN Europe, the European Association for the Promotion of Cogeneration, is the cross-sectoral voice of the cogeneration industry. Its mission is to work with EU institutions and stakeholders to shape better policies and eliminate administrative, regulatory and market barriers to the wider use of cogeneration in Europe.

COGEN Europe supports an ambitious, comprehensive and predictable legislative framework towards achieving the European Union's goal of "net zero" greenhouse gas emissions by 2050. We believe that the process of setting an emissions target for 2040 must take into account the role of energy efficient solutions and technologies, including ...

Cogeneration at the heart of European industry and communities 6 In the European Union: o Cogeneration saves 356 TWh of energy every year, equivalent to the total energy consumption of 23 million homes or the entire EU pulp & paper sector<sup>1</sup>. o Cogeneration prevents approximately 200 million tonnes<sup>2</sup> of CO<sub>2</sub>

emissions every year,

HanseWerk Natur replaced their previous landfill heat generator plant by partnering with COGEN Europe member, INNIO Jenbacher to install six new CHP gas engines to HanseWerk Natur's combined heat and power plant in Hamburg's largest and most efficient CHP plant, producing 8.4 megawatts of electrical output powering up to 20,000 households ...

In the context of the Fit for 55 and the upcoming Green Gas Package, COGEN Europe joins industry stakeholders in calling for a European Union (EU) policy framework that promotes the production, market uptake and system integration of renewable and decarbonised gases. The upcoming Green Gas Package will play a key role in aligning gas market regulation with the ...
