

# Onyx energy Norway

Why should you invest in Onyx power?

As a provider of reliable and safe power supplies, Onyx Power will contribute to energy security and grid stability, thus performing a critical role in enabling Europe's energy transition. Onyx Power is backed by Riverstone, one of the largest and most experienced investors in the energy sector globally.

What makes Onyx a good energy transition partner?

Onyx is your energy transition partner that's here to stay, no matter the journey ahead. Our approach is collaborative and transparent. This radiates from leadership to all pillars of our business and teams. Each project is custom designed for your physical footprint, with tailor-made solutions to fit your on-site needs.

Is Onyx a net zero energy district?

Since 2016, Onyx has developed, designed, constructed, and energized 6.2MW of solar sites, supporting the District's overall sustainability goal of becoming a "Net Zero Energy District" in California.

What type of energy does Norway produce?

Norway is a large energy producer, and one of the world's largest exporters of oil. Most of the electricity in the country is produced by hydroelectricity.

Why is energy in Norway so important?

With North Sea oil production having peaked, disagreements over exploration for oil in the Barents Sea, the prospect of exploration in the Arctic, as well as growing international concern over global warming, energy in Norway is currently receiving close attention.

Why are oil and gas exports important in Norway?

Since the discovery of North Sea oil in Norwegian waters during the late 1960s, exports of oil and gas have become very important elements of the economy of Norway.

With the help of customized technical solutions, Onyx Power will, if possible, convert all existing coal-fired power plants to alternative and CO<sub>2</sub>-neutral fuels by 2030 and expand the sites into diversified energy parks.

In August Norsk Kjekraft also submitted a proposal to Norway's Ministry of Energy for an assessment of the potential construction of a power plant based on multiple SMRs in the municipality of Ålgård, west of Bergen. That proposal followed proposals submitted for SMR power plants in Aure and Heim municipalities, as well as Vardø; ...

Members of the Onyx team have developed more than 11 GW of renewable energy projects across the U.S. and have over 275 years of collective industry experience. As of January 2022, Onyx operates over 175 MW of solar assets; Longstanding relationships with clients, operators, EPC contractors, asset managers, and
