

# Pakistan solar energy panel

Does Pakistan have solar power?

Solar power in Pakistan became part of the energy mix in 2013, following government policies aimed at supporting renewable energy development. Benefiting from nine and a half hours of sunlight daily, the country now has seven solar projects that contribute 530 MW to the national grid.

Where are solar panels installed in Pakistan?

The Quaid-e-Azam Solar Power Park (QASP) was built in the Cholistan Desert, Punjab, in 2015 and has a 400 MW capacity. As electricity prices doubled from 2021 to 2024, Pakistanis have taken to installing solar panels around the country, importing \$1.4 billion of panels from China in the first half of 2024.

Is Pakistan awash with solar panels?

From pv magazine 10/24 Pakistan is awash with solar panels. In August 2024, BloombergNEF revealed Pakistan had imported 13 GW of Chinese modules in the first six months of the year. One project developer told pv magazine that there is so much oversupply, modules are "lying on the road."

Are solar panels 'unaffordable' in Pakistan?

But the mass adoption of solar panels also risked making the power provided by the Pakistani grid "unaffordable", Awaiz Leghari, the energy minister, told the Financial Times. "Demand is shrinking off the grid. That's a big concern for us."

Who is developing a solar power Park in Pakistan?

Initiatives are under development by the International Renewable Energy Agency, the Japan International Cooperation Agency, Chinese companies, and Pakistani private sector energy companies. The Quaid-e-Azam Solar Power Park (QASP) was built in the Cholistan Desert, Punjab, in 2015 and has a 400 MW capacity.
