How much power does Panama have?

Panama's installed electrical capacity has grown steadily over the last decade. As of 2020, the country had 4116 MW of installed capacity, relying on a mix of fossil fuels (44.2%), hydro power (43.9%), wind (6.6%) and solar (5.2%).

Does Panama have a power station?

Panama's older Bahía Las Minas power station has shut down completely, while the newer Cobre Panama power station has committed to converting to natural gas by December 2023. In 2014, approximately 15 million long tons of thermal coal passed through the Panama Canal.

Is Panama phasing out diesel power plants?

Panama has committed to phasing out power plants that burn diesel or other heavy fuels by the end of 2023, with the decommissioned capacity to be replaced by the 670 MW Gatun power station, a natural gas plant scheduled to begin operations in 2024.

First Quantum Minerals Ltd. is expected to submit a proposal to the Panamanian government by June to convert a coal-fired power plant to cleaner energy, Reuters reported Feb. 9, citing energy minister Jorge Rivera. The proposal is part of the renegotiations on First Quantum's Cobre Panama copper project.
