

What is Peru's energy policy?

Peru's national energy policy (Propuesta de Política Energética de Estado Perú; 2010-2040) aims to diversify the country's energy mix and emphasize renewable energy and energy efficiency in order to meet the country's long-term needs.

How much oil does Peru produce a day?

Every day, Peru produces between 39,000 and 53,000 barrels of oil. As of 2019, Peru's energy consumption sources are made up of 43.61% oil - mainly because public and private transport run on this fuel - and 25.73% natural gas.

How do mining permits work in Peru?

All large energy projects in Peru are required to undergo a detailed environmental impact study (EIA-d), which must receive final approval from MINEM before construction can begin. Mining permits in Peru are acquired through various agencies depending on the scale of the project.

Which region in Peru has the highest level of mining employment?

The Arequipa region has the highest level of mining employment. The SEIN (Sistema Eléctrico Interconectado Nacional) is Peru's main electrical system, comprising 28,000 kilometers of transmission lines covering approximately 85% of the country, with remaining areas covered by smaller isolated systems.

Why does Peru still use faulty pipelines?

Despite orders to stop production following a spill, some companies continue to pump oil and use faulty pipelines. Indigenous groups have protested against oil and gas companies for years. Pipelines in Peru are also at risk due to seismic activity, heavy rains, and mudslides.
