What is the best portable power station?

She previously worked as a writer, editor, and fact checker for several science magazines. Though she researches and tests chargers for a living, her phone battery is usually low. Our top pick for three years running, the Jackery Explorer 1000 is the best portable power station for going off the grid or prepping for an emergency.

What is a portable power station?

Portable power stations are basically large batteries in protective boxes, with AC outlets and other charging ports built in. They're generally much bigger, heavier, more powerful, and more rugged than power banks and portable laptop chargers.

What should I look for in a portable power station?

We also look for protective features such as port covers to keep out harmful dust and moisture. Informative display: Most portable power stations offer a battery meter to show you how much charge they have left, but we prefer displays that provide a precise percentage and other useful data.

What makes the Explorer 1000 a good portable power station?

After researching and testing dozens of portable power stations over the past six years, we found that the Explorer 1000's impressive max output, wide array of ports, easy-to-use interface, and rugged exterior helped it stand out from the competition. This unit offers lots of power in a portable, durable, easy-to-use package.

Are portable power stations safe?

Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping. And since they have no motor, you don't need to keep gas handy or perform the oil changes and other minor maintenance that a combustion engine requires.
