Is the Philippines launching a solar power and battery storage project?

Image Credit: PIA Manila: In a bold move to ramp up its renewable energy ambitions, the Philippines launched a \$3.4-billion solar power and battery storage project has been kicked off north of the capital.

How many solar projects are in the Philippines?

Philippines' Department of Energy cleared 29 utility-scale solar projects in the January-August period. Most of them have a capacity of more than 180 MW and four of them even exceed 500 MW. The list also includes eight floating projects each exceeding 100 MW.

How many sustainability startups are there in the Philippines?

From 15 clean energy and climate startups in 2020, there are now 91 new sustainability-related firms operating in the Philippines, a bulk of which are solar, mini-hydro systems, and wind technologies.

Are solar batteries a good alternative to car batteries in Mindanao?

For instance, Shifttech Marine is a new enterprise from Cagayan de Oro in Mindanao that has developed a solar-powered battery for small fishermen as an alternative to the expensive car batteries that power their lights when they go out to sea at the break of dawn.

Solar energy may lessen your utility costs by 30-50% as you generate your own electricity from a home solar energy system. With solar panels on your home, you can use electricity for free during the day. As an alternative energy source, solar panels in homes in the Philippines help reduce the use of non-renewable energy.

Manuel V. Pangilinan-led Manila Electric Co. is partnering with global investment fund Actis, which will acquire a 40 percent stake in the Terra Solar project for \$600 million (P34 billion), marking the largest foreign direct investment in a greenfield infrastructure project in the Philippines.
