

Poland paladin battery

What is a Paladin 155mm self-propelled gun?

Equipped with the tracked M109A6 or M109A7 Paladin 155mm self-propelled gun and supported by an armored ammunition carrier (M992 Field Artillery Ammunition Support Vehicle) based on the same chassis, they have superior cross country mobility to equivalent towed artillery in order to keep up with the armored vehicles they support.

How much money does the Army need to buy a Paladin?

The FY 2014 budget called for \$340.8 million in Paladin funding, which would be two dozen vehicle sets at \$14.4 million per vehicle. The Army plans to buy 133 vehicles, in 66 one-half vehicle sets starting in 2014. One M109A7 howitzer and two supporting M992A3 ammunition carriers will be destroyed during tests.

Will Poland replace US Patriot air-defence battery?

Fot. PAP/Paweł Supernak A Polish deputy defence minister has announced that the US Patriot air-defence battery currently deployed in Poland will be replaced by a battery from another part of the world.

Could a M109 Paladin be used for ballistic missile defense?

They found that they significantly increased the gun's range. The Army is looking into using the M109 Paladin firing the HVP for ballistic missile defense, as traditional missile interceptors are expensive, and gun-based missile defense used for point defense would use artillery at a much lower cost per round.

Will Poland transfer a Patriot battery to Ukraine?

Polish Prime Minister Donald Tusk announced in April that there was no possibility that Poland would transfer a Patriot battery to Ukraine. This is because Poland is only at the early stages of implementing these systems into the armed forces - the first two batteries are expected to reach operational readiness by the end of this year.

Why did South Korea reject a P-52 M109A6 Paladin?

The P-52 was a 52-caliber variant of M109A6 Paladin offered to South Korea by BMY Combat Systems in 1992. It was rejected by South Korea in favor of K9 Thunder. Proposal stage only.
