

Power up company Å...land

PowerUP helps to increase the efficiency and service life of your Gas Engine. Manufacturer-independent gas engine service for MWM ® and Jenbacher ® gas generators, in-house ...

With a new energy cable to connect the Åland Islands with mainland Finland, the archipelago receives a long-term solution for ensuring supply of energy and an opportunity to sell its wind-generated power on the regional market. Currently the Åland Islands rely on up to 70% of its electricity being transferred via cable from Sweden.

UP-series generators are lightweight, reliable, and ideal as a main or backup power source for homes or businesses. Their versatile design suits various industries, including construction, military, telecommunications, and healthcare. The compact, portable design allows easy transport to construction sites, boats, off-grid houses, and more.

4 9th International Hybrid Power Plants & Systems Workshop Workshop After eight successful workshops in Hawaii (2013), Puerto Rico (2016), Tenerife (2018), Crete (2019), virtual (2021), ...

At PowerUP, we stand for innovation and reliability in the power generation industry. With technical excellence and a future-focused approach, our team is dedicated to providing top-tier solutions for modern energy needs, particularly in gas engine services.

We digitize and automate processes for manufacturing companies with the Microsoft Power Platform. We do this because we think it is important that we become better at utilizing the resources we have available. For the benefit of society, the climate, and your business.

The Åland electric grid relies on a combination of imported power and local renewable energy, primarily wind power. The grid is connected to both Sweden and Finland via high-voltage subsea cables, ensuring a secure energy supply.

A significant part of the offshore wind power potential is located in the sea areas of Åland, which offers remarkable opportunities for the region. o Åland's geographic location presents lucrative ...

Copenhagen Infrastructure Partners (CIP), Flexens and Lhyfe have partnered to develop an integrated energy island powered by offshore wind on the Åland island archipelago off the Finnish coast. Called the Åland Energy Island project, it will support gigawatt-scale offshore wind and green hydrogen production in Finland.
