Powersafe battery Cameroon

What are powersafe® SBS batteries?

Manufactured to the highest international standards, PowerSafe & #174; SBS batteries offer outstanding performance in both float and cyclic applications. The high energy density of these batteries makes them ideal for system upgrades or reduced installation footprint, while still delivering dependable backup protection.

Where are powersafe® batteries marketed?

PowerSafe® products are marketed under the SuperSafe® brand in the following specific countries - India,Indonesia,Malaysia,Singapore,Thailand,Australia and New Zealand. Featuring advanced Thin Place Pure Lead (TPPL) technology,PowerSafe SBS batteries deliver long life,high energy density and superior shelf life for telecommunications.

What are the different types of powersafe® C batteries?

Engineered to meet the requirements of the power industry, PowerSafe® C batteries are available in two series: CA-M (antimony alloy) and CC-M (calcium alloy).

What is a powersafe OPzV battery?

The PowerSafe OPzV range of valve regulated lead-acid batteriesuses a proven combination of gel and tubular technologies to offer a very high level of reliability. These single cells benefit from an optimised plate design that gives capacities in excess of DIN standard values.

What makes a powersafe CA-M Battery A good choice?

PowerSafe CA-M batteries with antimony alloy plates deliver maximized performance in cycling applications, allowing the battery to tolerate high temperatures. Extra thick positive grids make the CA-M battery one of most rugged in the market.

What is a powersafe DDM battery?

PowerSafe® DDm batteries deliver an ideal solution for large capacity Valve Regulated Lead-Acid (VRLA) battery requirements. Featuring a steel can (module) design with an integral racking system, PowerSafe DDm batteries provide a cost-effective battery system with compact, quick and simple installation process. select a product's specifications tab

powersafe® batteries deliver an ideal solution for large capacity valve regulated lead-acid (vrla) battery and flooded cell requirements. powersafe batteries are designed to handle a large range of applications across the battery market

Powersafe battery Cameroon

PowerSafe® DDm batteries deliver an ideal solution for large capacity Valve Regulated Lead-Acid (VRLA) battery requirements. Featuring a steel can (module) design with an integral racking system, PowerSafe DDm batteries provide a cost-effective battery system with compact, quick and simple installation process.

PowerSafe CC-M batteries with calcium alloy plates offer maximized performance in long discharge applications and reduced watering requirements. Both CA-M and CC-M batteries are supplied with 100% " out of the box" initial capacity.
