Promethean Power Systems designs and manufactures refrigeration systems for cold-storage and milk chilling applications in off-grid and partially electrified areas of developing countries. Our goal is to empower smallholder farmers through decentralized, sustainable cold storage solutions.

Promethean Power Systems has ambitious plans to meet the energy needs of all 3 million people living without energy. The plan, however does not stop there. Promethean Power Systems then plans to expand its energy operations beyond lights and charging stations and into things such as computers, TVs, refrigerators, and other appliances, to give ...

Promethean Power Systems designs and manufactures refrigeration systems for cold-storage and milk chilling applications in off-grid and partially electrified areas of developing countries. Our goal is to empower smallholder farmers through ...

Sorin is co-founder and director at Promethean. He served as the company's Chief Executive Officer and Chief Technical Officer and is the principal inventor of the company's patented energy storage technology. Sorin graduated with a Masters of Science in Engineering & Management degree from MIT.

Promethean Power Systems designs and manufactures rural refrigeration systems for commercial cold-storage applications in off-grid. Dairy processors who have not been able to collect enough quality milk to meet demand, which is growing at 6% annually.

From individual farmers to billion-dollar food and dairy conglomerates, Promethean Power Systems' thermal-energy-based technology makes a measurable difference wherever preserving perishables is necessary. It's what we do best. Since 2013, leading dairies have installed Promethean's systems across hundreds of village-level collection centres.
