

What is the Q-Sun solar nebula series?

The Q-Sun Solar Nebula Series is an advanced range of heterojunction solar cells(HJT) that features high-efficiency energy absorption and conversion capabilities. The Nebula Series is characterized by its lower temperature coefficients and excellent low-light performance,making it particularly suitable for high-temperature environments.

Who is Q-Sun solar?

Q-Sun Solar,an Anhui-based Chinese solar company,has signed an investment agreement with the municipal government of Xiantao City,Hubei province,to deploy an additional 10 GW of solar cell capacity and 12 GW of panel capacity. The company will invest approximately CNY 6 billion in the expansion plan.

What is a Q-Sun Solar Mercury series?

Mercury Series The Q-Sun Solar Mercury Series represents the latest advancement in photovoltaic technologywith our N-type Topcon PV modules. This series offers power outputs ranging from 400W to 720W,with efficiency levels between 22.5% and 23%.

Where is Q-Sun based?

The company has seen significant growth since its inception in 2014 in Chuzhou City,situated along the Yangtze River. With a decade of focused industrial evolution,Q-SUN operates three international research and manufacturing hubs,annually delivering over 4GW of efficient photovoltaic modules.

What is a Q-Sun solar Onyx series?

The Q-Sun Solar Onyx Series is renowned for its full-black panels and modern design,specifically crafted for residential photovoltaic markets with high aesthetic and performance demands. The Onyx Series panels feature a pure black surface with no metal grid lines,blending seamlessly with various roofing styles.
