

Why choose REFU energy storage systems?

REFU energy storage systems will complement and enhance Pramac's current hybrid energy storage product offerings and further accelerate the development of new technologies. Pramac is committed to providing commercial and industrial consumers with leading solutions for their adoption of renewable energy.

What is REFUstor?

REFUstor is a subsidiary of REFU Elektronik GmbH, headquartered in Pfullingen, Germany. It was established in 2021 and focuses on developing fully integrated, ready-to-use energy storage systems and stand-alone storage inverters along with an energy services management platform.

What does refu do?

REFU develops and integrates synergistic components for stationary energy solutions and thus offer a common platform for the 'energy system revolution'. We bundle our competencies in the areas of high-performance electronics in order to develop economical, efficient and environmentally conscious solutions.

Can refustor be used with existing PV systems?

The AC-coupled REFUstor can be easily integrated with existing PV systems. The highly modular solution allows it to be used in systems from 50 kW up to MWs in size to meet the demands of both energy and power applications. The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System.

What makes refu a successful company?

The key to our success lies in our ability to combine the expertise in controllable power electronics with customer-specific designs and production. REFU is a part of the multinational, diversified PRETTL Group.

La produzione avviene a Pfullingen e nello stabilimento REFU in Ungheria. Qui, l'azienda pu#242; attingere alla vasta esperienza del team, che ha venduto oltre 400.000 inverter fino ad oggi. REFU Elektronik GmbH fa parte del gruppo ...

For PRAMAC Storage Systems GmbH (formerly REFU Storage Systems GmbH, this means developing new software, hardware, and cloud solutions in addition to innovative power electronics. As a former part of the Prettl Group, PRAMAC Storage Systems focuses on the market for battery inverters and energy storage systems, and the company recently worked ...

REFUstor's highly efficient and extendable storage systems paired with their energy management solution provide businesses the opportunity to build their own energy ecosystem, while simultaneously reducing their electricity costs.

REFU Storage Systems) bedeutet das, neben der Entwicklung innovativer Leistungselektronik auch neue Software, Hardware und Cloud-Lösungen zu entwickeln. Als Teil von PRAMAC konzentriert sich PRAMAC Storage Systems auf den Markt von Batterie-Wechselrichtern und Speichersystemen und hat im Rahmen eines Pilotprojekts in enger Zusammenarbeit mit ...

Pramac Acquires REFU Storage Systems, Expanding Company's Commercial and Industrial Energy Systems Portfolio Acquisition adds new C& I energy storage system offerings to the Pramac portfolio of products SIENA, Italy - February 1, 2023 - Pramac GmbH, a leading provider of power solutions, generators and material handling equipment, and a wholly ...

The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System. It controls for self-consumption, peak shaving and time-controlled charging. It comes with an data edge controller automatically connected to a cloud-based portal - at no extra usage fee.
