

Should Moldova develop renewable electricity?

Developing renewable electricity would not only help Moldova achieve its National Energy Strategy and increase the country's energy security, but would also bring significant socioeconomic and environmental benefits.

What is the system integration of renewables for Moldova?

To provide Moldovan policymakers at all levels with a vision towards a clean, secure and modern electricity system, the International Energy Agency today launched a policy roadmap on System Integration of Renewables for Moldova.

What is the electricity system like in Moldova?

The electricity system in Moldova is characterised by its reliance on imports. In 2020, of its 4.4 TWh of electricity demand, 81% was supplied by imports, either from Ukraine (4%) or from the Cuciurgani-Moldavskaya GRES (MGRES) gas-fired power plant (77%) located in the breakaway region of Transnistria.

What is Moldova doing in the energy sector?

Moldova signed the Paris Agreement in 2016 and is among leaders of Eastern Partnership and Energy Community Treaty countries in terms of transposing EU acquis in the energy sector. The National Energy Strategy and Low Emissions Development Strategy have been approved.

What is the potential of RES for power generation in Moldova?

The technical potential of RES for power generation in the Republic of Moldova is estimated to be 65,029 GWh, equivalent to 5,591 ktoe.

Does Moldova have a power grid?

Moldova's electricity grid was predominantly built in the time of the Soviet Union, making it relatively old and inefficient. It is synchronously interconnected with Ukraine's Integrated Power System (IPS) and, in turn, Russia's Unified Power System (UPS) in the northern and south-eastern parts of the grid.
