

Russia inlyte energy

What is energy in Russia?

The Energy in Russia is an area of the national economy, science, and technology of the Russian Federation, encompassing energy resources, production, transmission, transformation, accumulation, distribution, and consumption of various types of energy. Energy consumption across Russia in 2020 was 7,863 TWh.

Is Russia moving away from fossil fuels?

Russia is home to some of the leading energy companies across the globe, such as Gazprom, Lukoil, and Rosneft. In 2022, seven out of ten Russians stated that it was important to them that their country shifts away from fossil fuels. Discover all statistics and data on Energy sector in Russia now on [statista.com](https://www.statista.com)!

What is Russia's energy strategy?

Russia's energy strategy prioritizes self-sufficiency in gasoline, so it tends to export minimal volumes. However, Russian refiners produced roughly double the diesel needed to satisfy domestic demand, and typically exported half their annual production, much of it to European markets.

Is Russia rich in energy resources?

Russia is rich in energy resources. Russia has the largest known natural gas reserves of any state on earth, along with the second largest coal reserves, and the eighth largest oil reserves.

Why is Russia expanding its liquefied natural gas capacity?

Furthermore, Russia has been expanding its liquefied natural gas (LNG) capacity, in order to compete with growing LNG exports from the United States, Australia and Qatar. In 2021, Russia exported 40 bcm of LNG, making it the world's 4th largest LNG exporter and accounting for approximately 8% of global LNG supply.

Who produces gas in Russia?

Gazprom and Novatek are Russia's main gas producers, but many Russian oil companies, including Rosneft, also operate gas production facilities. Gazprom, which is state-owned, is the largest gas producer, but its share of production has declined over the past decade, as Novatek and Rosneft have expanded their production capacity.
