

Why should I use Orus energy?

Guaranteeing the comfort of occupants is of paramount importance to Orus Energy. We establish the load-shedding scenario with you, based on the thermal inertia of your building, so as not to impact comfort or operations. How can I access Orus Energy platform?

How much electricity does Rwanda use?

The extent of grid electricity is limited and mainly concentrated near Kigali. Most of the country uses firewood as its main energy source. Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries.

Is Rwanda facing an energy crisis?

Several indicators point to an energy crisis in Rwanda including: accelerated deforestation, a biomass energy deficit and deterioration in electricity generation and distribution systems. The major part of the energy consumed in Rwanda today still comes from wood (80.4 per cent).

What is Rwanda's Energy use?

The country is in the midst of a rapid expansion of its electrical grid and many new plants are proposed or under construction. Biomass is the most important energy source utilized through firewood and agricultural waste for cooking. In 2014, this represented 85% of Rwanda's energy use.

Is there a biogas support programme in Rwanda?

Report on the Feasibility Study for a Biogas Support Programme in the Republic of Rwanda. SNV and Ministry of Infrastructure (MININFRA), Kigali. EAESI (2005). Rwanda National Paper. Presented at the Forum of Energy Ministers for Africa (FEMA), East African Energy Scale Up Initiative (EAESI). Nairobi 24-2 June 2005.

What is Rwanda's energy mix?

In 2019, Rwanda's energy mix was dominated by biomass and waste (74%) and oil products (20%), while natural gas, coal and hydro account for the rest of the energy supply. In 2020, less than 5% of the population had access to clean cooking and 50% had access to electricity.
