1.1 My Plants A Sol-Ark inverter, along with any integrated component on the system like grid, solar panels, batteries, generators, microinverters, and home loads, are all centrally managed within a designated "Plant" on MySolArk. A plant is the digital representation of the solar system, where the user can monitor the performance and operation ...

private PV system also consumes electricity from the main electricity grid operated by Connect Saint Helena Ltd (CSH). In such cases it is necessary for the private PV system to be connected to the electricity grid. This enables the owner of the private PV system to consume electricity from the grid when the private PV system is not in operation.

The Roads Section, supported by Crowley's Electrical Services (C.E.S), has recently successfully installed 100 new solar lights to replace the old solar street lights around the Island and to add additional lights in places where none existed before. These new solar lights have been installed as they are more efficient than the old units. The [...]
