

What do Saint Martin electrical outlets look like?

When you are going on a trip to Saint Martin, be sure to pack the appropriate travel plug adapter that fits the local sockets. But what do those electrical outlets look like? In Saint Martin, types C and E are the official standards.

Who is St Maarten's electrical specialist?

St Maarten's Electrical Specialist! We are one of the largest electrical retail and services businesses in the Caribbean. We sell electrical and electronic products, parts and services for land, marine and generators. We are in Colebay, St Maarten.

What type of plug does Saint Martin use?

In Saint Martin, types C and E are the official standards. Saint Martin has standardized on the same plugs and receptacles as France, just like all other French overseas territories. Since type F plugs are identical to type E plugs, they can also be used with type E sockets. What is the mains voltage in Saint Martin?

What is the voltage in Saint Martin?

The voltage in Saint Martin is 220 volts and the frequency is 60 Hz. [Click here](#) for a global map showing the spread of the different plug types used around the world. [Click here](#) for a detailed list of the countries of the world with their respective plug and outlet types, voltage and frequency.

Why do St Martin cabinets sit on leveling feet?

Every drawer box we manufacture features soft-close, full-extension under-mount hardware to maximize storage space and make operation a breeze. Leaks, spills and minor floods are common in the kitchen which is why every St. Martin cabinet sits on leveling feet to prevent it from wicking up minor amounts of water.

CONTA-CLIP offers a wide range of passive electronic modules for fast, compact and safe functions. They can be mounted on TS 32 and TS 35 mounting rails using the combi-foot and have screw-type PCB terminal connections (2.5 mm \times 178;).
