

Sepco solar Bahamas

Who is SEPCO?

SEPCO is the worldwide leader in solar lighting and off-grid solar power systems. We are helping the world go green by taking the lights off the grid.

Does SEPCO install solar lights?

SEPCO has 27 years of experience installing commercial solar LED lighting systems and off-grid power systems in the field. SEPCO manufactures independent solar solutions to help reduce cities' carbon footprints. We know what solar lighting solution best suits your application, no matter the industry or geographic location.

Who is Bahamas solar?

At Bahamas Solar we take care of your project from start to finish. Offering full turnkey systems for all residential and commercial operations. Serving all The Bahamas, from Nassau to the out islands. We offer customized solutions tailored to your specific needs. The first step to going solar is a site assessment.

Solar gives you the option for complete energy independence. Whether you're looking to reduce your electricity bill, get completely off-grid, or set up a battery backup system, we can help. Smart Energy offers some of the best prices on the market.

As the Bahamas has close to six daily peak sun hours. Solar Power can offset a significant part of your power bill. Our goal is to design and build systems that can achieve maximum ...

SEPCO's solar-powered LED street light systems are an efficient means of providing lighting without the need for standard utility power. Every solar street light system provides cost savings by eliminating electric bills and the need to trench standard electric wires for installation.

Bahamas Solar has been installing solar for the past 25+ years. Therefore, we have the knowledge and experience needed to make sure your solar project is done to the highest standards. Our workers are licensed contractors in California and will bring these skills to your project in The Bahamas.

COSt SaVingS: Solar provides cost savings because the sun acts as a "utility energy company" without cost.

EaSy inStaLLatiOn: Solar panels are easy to install, only needing basic wiring and bolts for secure conversion.

LOW VOLtagE: Solar utilizes lower voltage, typically 12 Volts, which means safer usage and installation.
