

# Shenxing lfp battery Bonaire Sint Eustatius and Saba

What is the Shenxing Superfast charging battery?

The Shenxing superfast charging battery,designed for large-scale commercial consumption,will enable an EV to travel 400km from a ten-minute charge. It is the world's first LFP battery with 4C superfast charging,meaning charging at a current of 12A above the diffusion limiting current.

Will CATL's new battery reduce the cost of LFP batteries?

LFP batteries are typically cheaper but are known to offer lower energy density. CATL's new battery looks to change that. In January,CATL said it would reduce the cost of LFP batteries per kWh by a massive 50%by the middle of 2024. It looks like it's well on its way. You can watch CATL's 2024 product launch below.

Why should you choose CATL for a Shenxing battery?

Thanks to its strengths in extreme manufacturing,CATL has achieved the ability to rapidly transfer technology from lab to market,enabling rapid mass production of the Shenxing battery.

How many vehicles will use the Shenxing battery?

According to the provided information,50 additional vehicles in the countrywill utilize the Shenxing battery. CATL (Contemporary Amperex Technology Co Ltd) is negotiating with General Motors (GM) to license its LFP (lithium iron phosphate) battery technology.

Will Shenxing become a standard product for electric vehicles?

CATL's Gao Huan,CTO of its China EV business,stated: "While the superfast charging may currently be an option for high-end electric vehicles,we hope that through continuous efforts to improve technology and reduce costs Shenxing will become a standard product for every electric vehicle." How well do you really know your competitors?
