

Sigora dot com Cambodia

Sigora International provides utility-management systems for the 1.3 billion people in frontier markets without a grid connection. Using a smart meter custom-built for emerging markets, web-managed software, and simple payment solutions, the Sigora platform streamlines bill collection, reduces revenue losses, and deters energy theft.

Sigora is a provider of utility-management systems engineered for frontier markets. For established urban grid utilities and rural micro-grid developers, Sigora's platform transforms energy access into bankable business. Leveraging specialized hardware, web-managed software, and simple payment solutions, the company's platform streamlines

Sigora International, based in Illinois, is a provider of utility management systems specifically engineered for frontier markets. Their platform is designed to address the challenges faced in last-mile and grid-edge connectivity in underserved regions.

Sigora International is a speciality provider of utility-management systems engineered for frontier markets. For both established urban grid utilities and rural micro-grid developers, Sigora's platform transforms energy access into bankable business.
