

Skyrun solar generator Honduras

How much solar energy does Honduras produce?

In 2016, the state power energy company ENEE cited that 10.2% of the nation's electrical system was generated from solar sources, specifically through PV power plants. This is a major breakthrough since Honduras becomes the first non-island nation to exceed the 10% mark in terms of solar energy production.

Does Honduras have a photovoltaic boom?

Honduras also leads other Central American nations in terms of the amount of installed PV capacity and is only second to Chile in all of Latin America. This energy revolution is spurring more development in Honduras and there are many investors hoping to take advantage of the photovoltaic boom in the country.

Is Honduras a good country for solar energy?

This is a major breakthrough since Honduras becomes the first non-island nation to exceed the 10% mark in terms of solar energy production. Honduras also leads other Central American nations in terms of the amount of installed PV capacity and is only second to Chile in all of Latin America.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
