Will a solar power plant save money in Chad?

The solar photovoltaic plant at Djermaya, 30km north of N'Djamena, the capital, "will be the first utility-scale renewable energy project and will be the first privately owned, financed and managed power plant in Chad. It will generate significant savings for the country," Pacquement explains.

What is a solar kiosk?

The solar kiosks provide last mile connectivity to low-income Africans. The solar kiosk provides phone charging services and a WIFI access point, the first one-stop-shop platform in Africa. ARED develops a solar kiosk platform and a mini server to facilitate access to phone charging and digital applications for low income people in Africa.

Does Chad have a solar plant?

In Chad only 1 in 20 people have electricity. But the Central African country has lots of sun. A UK company is developing the first solar plant in one of the world's poorest places. Robert Pacquement and the Djermaya Solar development team do not shy away from a challenge.

How did Power Africa help Djermaya solar project in Chad?

In Chad, Power Africa transaction advisory and technical assistance helped secure a \$20.6 million (EUR18 million) loan to bring the 42 MW Djermaya Solar project to financial close.

Who is investing in Djermaya solar?

InfraCo Africa, a privately managed company backed by public funds from the UK, Switzerland and the Netherlands that's part of the Private Infrastructure Development Group, will invest up to US\$3 million into Djermaya Solar and, through its developer Aldwych Africa, provide the resource and expertise needed to develop this pioneering project.

ARED's Smart Solar Kiosk is a simple idea but with enormous potential.
