Our solar panels are designed for easy maintenance, allowing for maximum use of roof space. They are durable enough to walk on and are adapted for activities such as snow removal, making them a practical and sustainable choice for all types of climates. What type of solar roof do you sell?

Is a solar roof a good alternative to a conventional roof?

Solar roof is a great alternative to conventional roof and as source of energy. In the long run, the price of a solar roof is even cheaper than a regular roof because my roof generates electricity over time.

What is A Midsummer wave solar roof?

With Midsummer's solar roof, you no longer have to compromise between solar energy and aesthetics. Midsummer WAVE is a wave-shaped solar panel that follows the shape of your roof tiles.

Our solar roofs are designed for Sweden's harsh climate, crafted to brave all weather conditions, from heavy snowfalls to pounding hail, driving rain, and fierce winds. We utilize premium-grade components sourced from industry leaders and employ a proprietary mounting system to ensure the resilience of our solar solutions.

This is because a solar panel system usually weighs about 20kg per square metre, which the great majority of roofs can hold. However, flat roofs may not always be strong enough for solar panels. Drilling into a flat roof can cause leaks, so an installer will usually ballast the panels instead - but these will add around 80kg per panel.
