How much do solar panels cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). We suggest using NREL's PVWatts Calculator for estimating your solar installation costs. First, consider your average household energy needs. This tells you how big of a system you need.

Why are residential solar panels so expensive?

Since 2010, residential solar panel prices have fallen by roughly 50% while US solar deployment has grown by over 2,000%. The slight rise in residential solar pricing from 2020-2023 is largely attributed to supply chain tangles from the pandemic.

Are solar panels cheaper?

Utility-scale solar installations are now cheaper than all other forms of power generation in many parts of the world and will continue to replace older, dirtier power plants that run on coal and natural gas. Additionally, homeowners are now able to own their power production more cost-effectively than ever before.
