How do I choose a solar panel installer?

Ensure that you hire a professional installer who is experienced in solar panel installation to ensure that the system is set up correctly. Additionally, inquire about the maintenance needs of the panels and any servicing that may be required to keep the system running efficiently.

Do solar panels use PLN?

The reason is simple, solar panels only produce energy when there is sufficient direct sunlight. In Indonesia, that amounts to around 4-5 hours/day. The rest of the time you would need PLN to supply electricity to your building, especially if you wish to run air conditioners, which consume the most power in most households!

We're the industry experts when it comes to Indonesia solar power systems and panel installations. Catering to residential and commercial or business solar systems, we've made the cost of solar panels in Indonesia affordable and reasonable for anyone willing to ...
