

Solar power generation tax payment process

Will new solar homes get a payment from suppliers?

New solar homes and businesses creating and exporting electricity to the grid will be guaranteed a payment from suppliers under new laws to be introduced by the government this week (Monday 10 June).

How do tariff rates for solar PV installations work?

The amount of generation which is deemed to be exported is set by the Secretary of State for the Department of Energy Security and Net Zero each year in their annual determinations. Tariff rates for Solar PV installations are uniquely split into Higher, Middle and Lower bands.

When will solar panels pay back to the grid?

New rules introduced this week will give homes and businesses that install solar panels payments for exporting electricity back to the grid from 1 January 2020.

Do generators receive deemed export payments?

Generators may receive deemed export payments for installations with a capacity of 30 kilowatts or less if an export meter is not fitted. This is where export is estimated as a percentage of the generation meter reading, rather than being based on an export meter reading.

How do SEG generators get paid?

SEG Generators are paid by their chosen SEG Licensee for the electricity which they export back to the National Grid. Generators thinking of applying for a SEG tariff should shop around to see which tariff is best for their individual circumstances. Our page for Generators has more information on how to apply and the specific eligibility criteria.
