By installing domestic and industrial solar systems in the DRC, Nergietech aims to replace kerosene, gasoline and diesel, thus reducing greenhouse gas emissions. Our model, developed with local communities, allows us to offer high-quality solar ...

Existing HEP could fill in the "gaps" when solar is not available. However offgrid power is essential in the rural areas and small towns across this vast country. Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gW of installed solar capacity !
