Traditional solar power towers are constrained in size by the height of the tower and closer heliostats blocking the line of sight of outer heliostats to the receiver. The use of the pit mine's "stadium seating" helps overcome the blocking constraint.

As is the case with other solar power technologies, solar power towers represent a type of electricity generation technology that is cleaner than generating electricity by using fossil fuels. Thus, solar power towers are one of the cleanest options for generating electricity.

Solar kits include Canadian solar panels with 25 year warranty, grid-tied AC Inverter, rooftop mounting racks, wiring, cables, hardware, step-by-step instructions and permit-ready plan. Click on any kit to view parts list, specifications and options for ...
