The city's position in the Southern Sub Tropics provides favorable conditions for solar photovoltaic (PV) installations throughout the year, albeit with seasonal variations. The energy output from solar PV systems in Montevideo fluctuates across the seasons.

The use of photovoltaic panels allows the user to be self-sufficient in energy, generating all the energy consumed and returning the surplus to the grid. On the other hand, home automation generates automatisms with the capacity to measure and manage environments, resulting in greater comfort with lower energy costs.
