

This renewables readiness assessment (RRA) for the Solomon Islands has been developed in collaboration with the Ministry of Mines, Energy and Rural Electrification through the SIDS Lighthouses Initiative. It identifies several drivers to accelerate the deployment of renewables and ramp up energy transition efforts in the country.

The Solomon Islands Renewable Energy Development Project complements other ADB energy sector interventions, that help install more renewable energy generation, including the Tina River Hydropower Project as well as another project that is converting five diesel-powered provincial grids to solar hybrid systems.

The Solomon Islands Ministry of Mines, Energy and Rural Electrification for the Honiara grid has launched a new partnership on renewable energy transition modelling with the Australian Department of Climate Change, Energy, the Environment and Water.

In the Solomon Islands electricity is supplied to less than 20% of the population. Almost all generation is based on imported diesel fuel. This report assesses the potential for developing alternative energy sources for electricity generation, in particular small scale hydropower for the outstations of the Solomon Islands Electricity Authority.

The new report finds that accelerated deployment of renewables and the uptake of energy transition innovative solutions in the Solomon Islands can address the challenges. To drive action towards accelerated energy ...

Prime Minister Manasseh Sogavare today has launched the Solomon Islands Renewable Energy Roadmap - announcing major reforms in the energy sector in the areas of policy, legislation, regulation, institutional, financial and management arrangements.

Like most pacific islands countries, Solomon Islands is heavily dependent on fossil fuels for its transportation system and diesel for its power generation. The country, however, is now turning to renewable energy to ...

Like most pacific islands countries, Solomon Islands is heavily dependent on fossil fuels for its transportation system and diesel for its power generation. The country, however, is now turning to renewable energy to replace these fuels.
