Solar-powered sun shading is driven by an integrated electric motor. The motor is powered by the solar panel. The solar panel captures light and converts it into electric energy, regardless of the sunlight's intensity. The generated energy is stored in the battery. Direct sunlight is not necessary for the solar panel to generate energy.

Ivory Coast is progressing in solar power plant development, with ten multinational companies qualifying for partnership. The plants, to be located in the Bafing region, are part of a public-private partnership. They are under the World Bank's Scaling Solar program.
